

1

Today Technologies

- Technology changes everyday, you must keep up with these changes to remain digitally literate
- Digital literacy involves having a current knowledge and understanding of computers, mobile devices, the web, and related technologies

<https://www.eetimes.com/sensors-technology-of-today-and-tomorrow>

2

Computer

- Computer contains many electric and electronic components (and might contains mechanical components) known as hardware
- It operates under the control of instructions stored in its own memory, known as software.

3

Class of Computer

- It can be classified in many ways, such as by purpose, function, usage, generation of technology
- Classified by purpose on the basis of size

Microcomputers
(Personal Computers)

Minicomputers
(Mid-range Computers)

Mainframe Computers

Supercomputers

4

Data & Information

Data

- It is a raw and unorganized fact that required to be processed to make it meaningful.
- It comprises facts, observations, perceptions numbers, characters, symbols, image, etc.

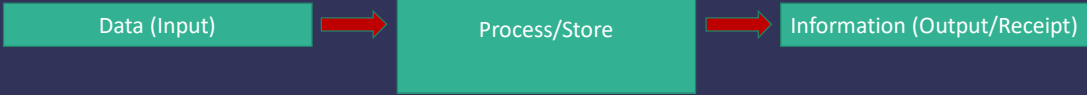

Information

- Information is a set of data which is processed and structured in a meaningful way according to the given requirement.

5

Data & Information

Medium Sodas	฿60.0 each	x 2
Small Chicken Wings	฿100.0 each	x 2
Caesar Salad	฿150.0 each	x 1
Cookies	฿75 each	x 3
Amount Received	฿1,000	

IT.KMITL SuperStore 1 Soi Chalongsak 1, Ladkrabang, Bangkok 10520 Tel: +66 2 723 4900		
Quantity	Item	Total
2	Medium Sodas	120.00
2	Small Chicken Wings	200.00
1	Caesar Salad	150.00
3	Cookies	225.00
Total Due		695.00
Amount Received		1000.00
Change		305.00
Thank You ☺		

6

Data & Information—Input

- A keyboard contains keys you press to enter data and instructions into a computer or mobile device

Desktop Keyboard

Laptop Keyboard

Onscreen Keyboard

Type Cover Keyboard

Mini Keyboard

Virtual Keyboard

7

Data & Information—Input

- A pointing device is an input device that allows a user to control a small symbol on the screen called the pointer.

Trackball - Tom Cranston, Fred Longstaff and Kenyon Taylor (1952)

Mouseketeer - Douglas Engelbart (1963)

Xerox Alto Mouse (1973)

8

Data & Information—Input

Some devices enable you to speak data instructions using **voice** input

Microphone

Built-in Microphone

Ear Phone

9

Data & Information—Input

Some devices enable you to capture live full-motion images using **video** input

Webcam

Built-in Webcam

10

Data & Information—Input

Some devices enable you to capture images

Scanner

Digital Camera

A scanner is a light-sensing input device that converts printed text and images into a form the computer can process

11

Data & Information—Output

- An output device is any hardware component that conveys information from a computer or mobile device to one or more people

Printer

An output device that produces text and graphics on a physical medium, such as paper or other material

3D Printer

A 3-D printer can print solid objects, such as implants, toys, parts, prototypes, and more

12

Data & Information—Output

- A display is an output device that visually conveys text, graphics, and video information

Desktop Display

Laptop Display

Tablet Display

Smartphone Display

Digital Camera Display

13

Data & Information—Output

Speakers allow user to hear audio such as music, voice, and other sounds

Headphone

Earbud

Ear Phone

14

Data & Information—Storage

- Memory consists of electronic components that store instructions waiting to be executed and the data needed by those instructions
- Storage media is used to keep data, instructions, and information. These are operated by a storage device (writes/reads).

Harddisk Drive (HDD)

USB Flash Drive

Optical Disc

Solid State Drive (SSD)

Memory Card

Cloud Storage

15

The Web

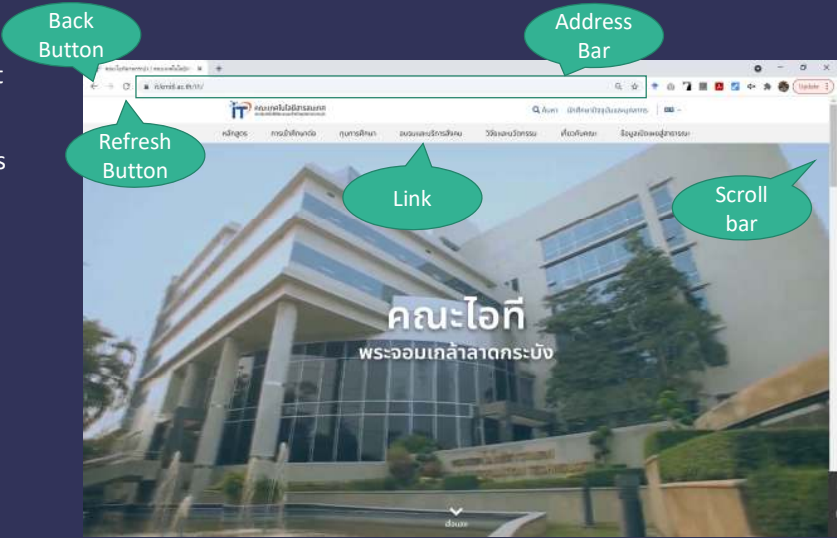

- The Internet is a worldwide collection of computer networks that connects millions of businesses, government agencies, educational institutions, and individuals
- The Internet was first invented for military purposes, and then expanded to the purpose of communication among scientists under the development of the Advanced Research Projects Agency Network (ARPANET) in the late 1960s.
 - University of California, Los Angeles (UCLA)
 - Stanford Research Institute's Augmentation Research Center
 - University of California, Santa Barbara (UCSB)
 - University of Utah

16

Surf the Internet—Web Browser

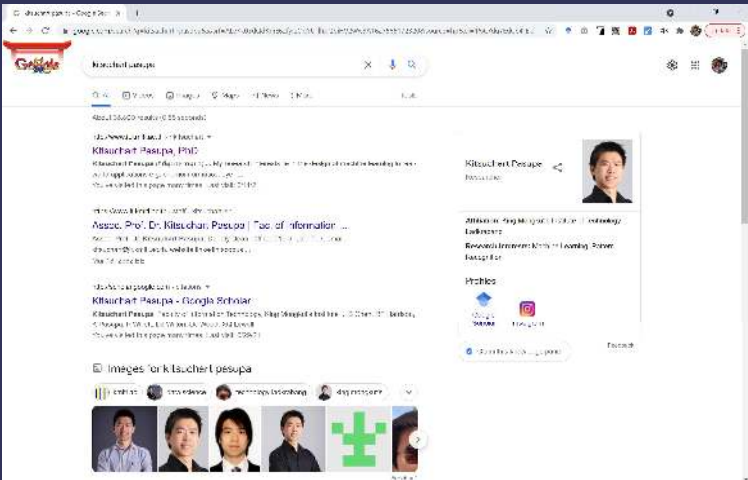

- A browser is software that enables users with an Internet connection to access and view webpages on a computer or mobile device.

17

Looking for something on the Internet?

- A search engine is software that finds websites, webpages, images, videos, news, maps, and other information related to a specific topic
- It collects the website by using spiderbot or crawler. The crawler is an Internet bot that systematically browses the World Wide Web for the purpose of Web indexing.

18

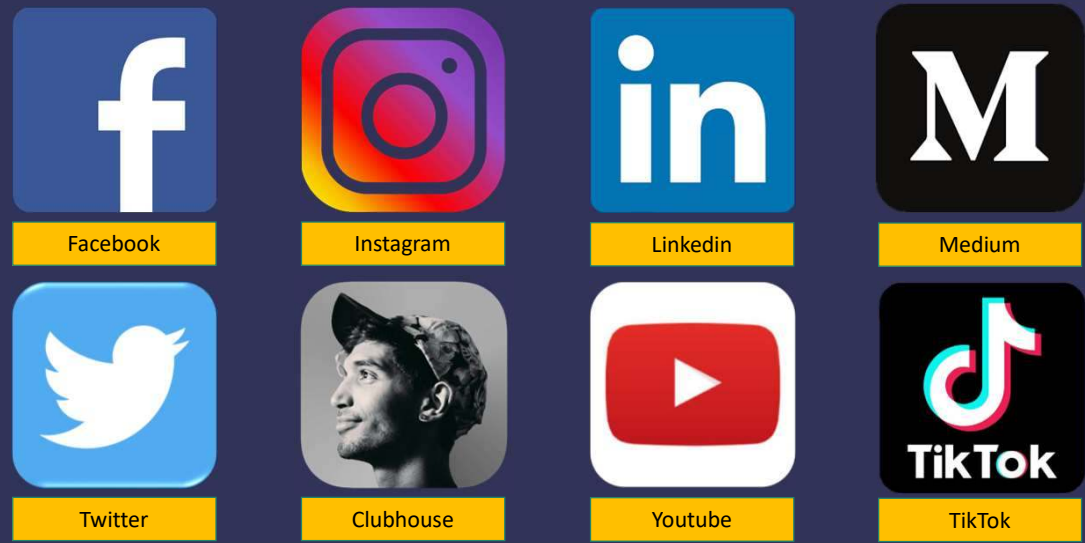

Online Social Network

- An online social network encourages members to share their interests, ideas, stories, photos, music, and videos with other registered users

19

Online Social Network Platforms

20

Digital Safety and Security

- It is very important that all users should protect their computers and mobile devices

Virus and Other Malwares

Privacy

Health Concern

Environmental Issues

21

Digital Safety and Security

- It is very important that all users should protect their computers and mobile devices

Virus and Other Malwares

Privacy

Health Concern

Environmental Issues

22

Virus and Other Malwares

Virus

- a piece of code that inserts itself into an application and executes when the app is run.

Ransomware

- disables victim's access to data until ransom is paid

Spyware

- collects user activity data without their knowledge

Adware

- serves unwanted advertisements

Trojans

- disguises itself as desirable code

Worms

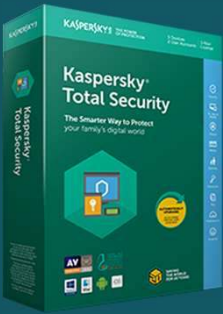

- spreads through a network by replicating itself

Keyloggers

- monitors users' keystrokes

23

Antivirus

24

Digital Safety and Security

- It is very important that all users should protect their computers and mobile devices

Virus and Other Malwares

Privacy

Health Concern

Environmental Issues

25

Privacy

- Crimes Opportunities
 - Social Media is fostering a big rise in real-world stalking
- Cybercrimes Opportunities
 - identity theft
 - financial fraud
 - revealing of personal information—messages, images, and video and audio recordings—without individuals' consent or permission (cyberstalking, cyberharassment/cyberbullying)

26

Privacy—Password

- It keeps your personal information safe (including emails, files, other content) and prevent someone else from getting into your account
- Create a **strong, long, and unique** password that can be memorable to you but nearly impossible for someone else to guess
 - Use a combination of letters, numbers, and symbols (ASCII-standard characters only)
 - Avoid personal information and common words
- Hide written passwords
- Manage your passwords with a tool

27

Privacy

28

Digital Safety and Security

- It is very important that all users should protect their computers and mobile devices

Virus and Other Malwares

Privacy

Health Concern

Environmental Issues

29

Health Concern

Technology addition

- Someone becomes obsessed with using technology. Tech dependence can lead to teen consequences that span from mild annoyance when away from technology to feelings of isolation, extreme anxiety, and depression.

Technology overload

- It is the device proliferation and/or information overload that causes cognitive and physical burdens on human beings due to the use of multiple gadgets with multiple functions to accomplish multiple tasks in everyday activities. You may feel distracted, anxious, fatigued, or even depressed

Office syndrome

- Office Syndrome refers to a group of various symptoms including the inflammation of neck, shoulder and back muscles. These symptoms are caused due to repetitive muscle strain during having long period of unhealthy positions such as sitting in front of a computer screen for several hours.

30

Office Syndrome

Do

Don't

Ergonomic Chair

Spinal Disc Herniation

31

Digital Safety and Security

- It is very important that all users should protect their computers and mobile devices

Virus and Other Malwares

Privacy

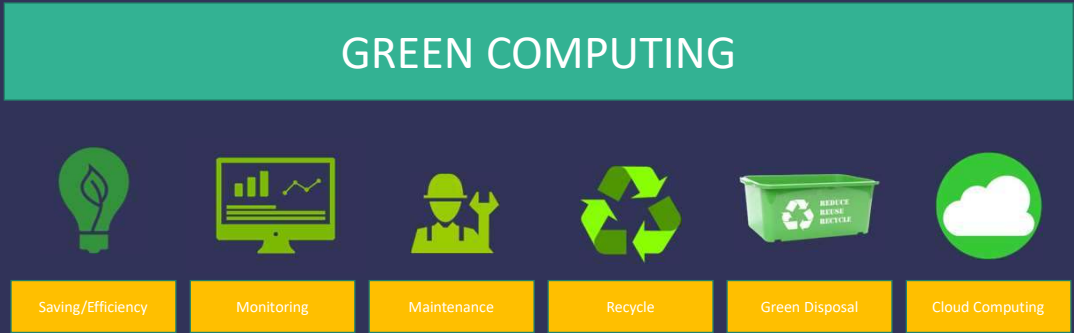

Health Concern

Environmental Issues

32

Environmental Issues

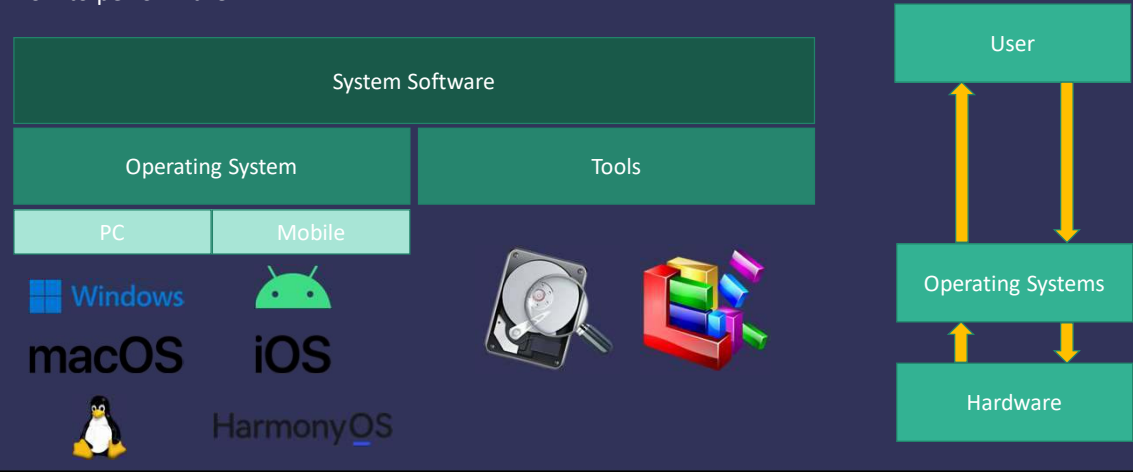

- Green computing is an approach to reduce the electricity consumption and environmental waste generated when using a computer

33

Programs & Apps

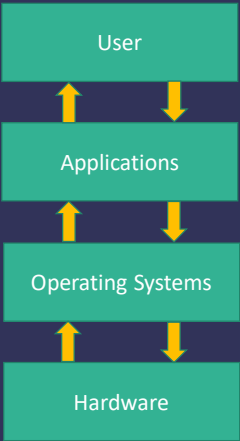

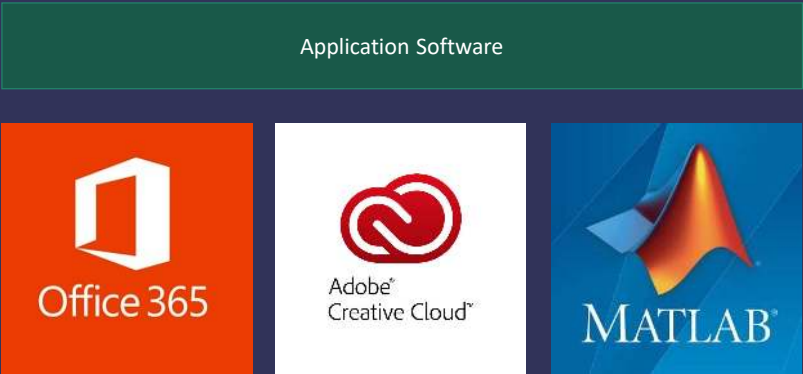

- The software known as a program, tells the computer which tasks do it required to perform and how to perform them

34

Programs & Apps

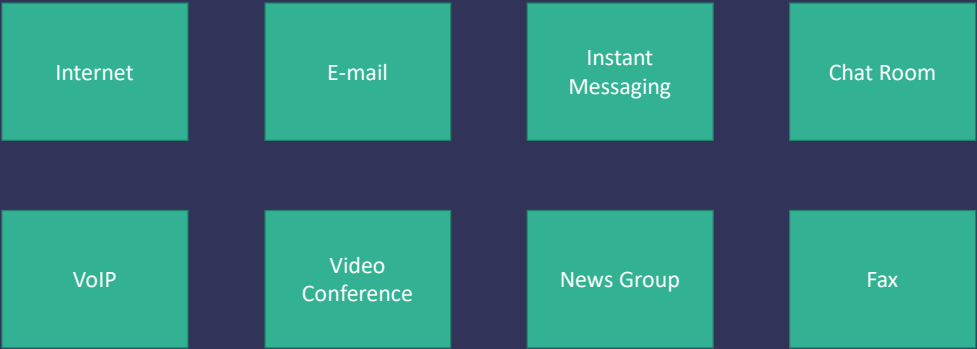

- The software known as a program, tells the computer which tasks do it required to perform and how to perform them

35

Communications and Networks

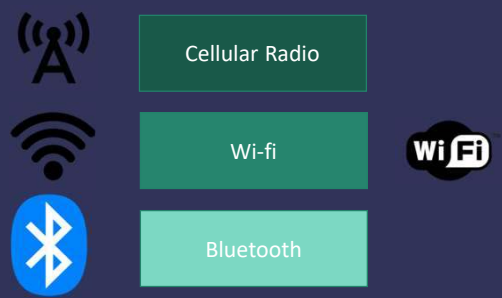

- Information can be generated by, one or more of these communications technologies:

36

Communications and Networks

- A communications device is hardware that is capable of transferring items from computers and devices to transmission media and vice versa
- A network is a collection of computers and devices connected together, often wirelessly, via communications devices and transmission media

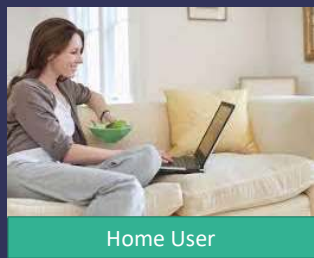

37

Technology Uses

38

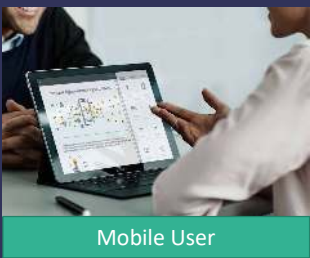

Technology Users

Home User

Small Home/Office User

Mobile User

Power User

Enterprise User
